

P-05-1014 Give Dental practices and their staff the “key worker” status

This petition was submitted by Owain Dimmick having collected a total of 233 signatures.

Text of Petition:

During the initial Covid-19 outbreak dental practices were staggered to be classed as “non essential medical” despite our roles saving lives through urgent infection care and early oral cancer detection. There are huge systemic risks associated with poor oral health which can’t be ignored. We also don't want to be in a position again where our patients could be left in pain due to Welsh Government regulations severely limiting the range of emergency treatments possible.

Additional Information

For decades dentistry had lead the way with cross infection control and utilisation of PPE. Alongside social distancing waiting areas, dental practices have now equipped themselves with the highest level of PPE, including respirators and full gowns to ensure they protect themselves, their staff and their patients, mitigating the risks no matter what the infection rate in the locality is.

Please support us to continue to care for our patients and provide what we judge to be appropriate dental treatments even if local or national lockdown measure are re-introduced.
