

P-05-1062 Abandon the rt-PCR test for covid-19 testing as its unfit for purpose

This petition was submitted by Robert O'Shea having collected a total of 96 signatures.

Text of Petition:

It has come to light that the NHS only used 35x amplification on PCR testing prior to the alleged pandemic. But now the NHS are using 45x amplification and the amount of false positives increases dramatically. This is utterly absurd! The PCR is not testing for a novel coronavirus – it is testing for the subjects nonspecific endogenous cellular exudation! RNA particles. End the case-demic now and cease all swob rt-PCR now.

Additional Information:

At 45x amplification it is clear to those who independently research and have an academic science background that the PCR test is being used to cause fear and hard-hitting headlines.
